

# STYLEGUIDE 2020

## THE OPTIMAL VISUAL SENSATION

Visiting a hospitality establishment is like a symphony. Various facets such as the restaurant's decor, the presentation of the dishes up to departure from the restaurant are harmoniously synched with each other.

Guests wish to be surprised by a complete experience that the hospitality establishment has to offer. The perfect combination between dish and the table decoration stimulates the sharing of the experience and forms the basis for each occasion's unique success factor.

In current Styleguide, you shall be inspired by the latest trends and themes such as sturdy vintage, luxury, functional, multi-coloured and eco-friendly. The Stylepoint range offers a fitting interpretation and complementation to each and every hospitality concept.

Be inspired by the variation of forms, colours, formats and materials. Would you like to check, test and compare the product range? Please feel free to contact us for an appointment in our welcoming 520 m<sup>2</sup> inspiration centre in Utrecht, only 30 minutes from Amsterdam Airport.

Let us inspire you!

# JERSEY

STRONG, BRISK AND COLOURFUL

Mix & Match! Jersey is very strong and scratch resistant. A colourful and fresh product series that is not only perfectly suitable for serving small snacks but larger dishes also. The Jersey range's completeness enables a great number of possibilities, thus it can be implemented in a broad spectrum of hospitality concepts. From street food and shared dining to hotel restaurants and fine dining, Jersey shall always provide your concept a fresh and colourful complementation. Jersey is perfectly suitable for hospitality establishments with high tableware circulation where durability is paramount. All pieces in this range are manufactured in accordance with the English method and come with a glazed footing in order to avoid scratching. Due to this porcelain's high quality, we provide a 5 year edge chip warranty on selected items.

# STONEHEART

Stoneheart terracotta is vitrified stoneware, made of unique clay. It is finished at 1150 degrees and is therefore much stronger, non-porous and more chip resistant compared to standard terracotta which is baked at around 950 degrees.

\* On selected items

**SUPER STRONG OFF-WHITE PINFIRED  
 PORCELAIN FOR A GREAT PRICE**

This revolutionary vitrified hospitality porcelain is super strong and provided with lifetime edge chip warranty. A standard hospitality plate breaks at an impact test value of 15 to 30. The Q Performance plates can resist impact test values of up to 90.

**Coupe plate**  
**QP2004** 28 cm / per 6

**COMBINE WITH**

**Break preventing Crystalline glass**  
 p. 141

Q Performance is 6x stronger than standard hospitality tableware. The glazed base prevents scratching when stacking. The tableware's high quality contributes to the dishes remaining warm longer. Q Performance is particularly well-suited for banqueting, catering and hotel.

**SUPER BONE FINE CHINA**

St.James's lightweight dinnerware is made from Vitrified Fine China porcelain with the extra addition of Natural Bone Ash. By using this Natural Bone Ash, thinner and more refined plates can be produced without losing strength. St.James solely utilises the best European raw materials, whereas Natural Bone Ash is still imported from the U.K.

**ECO-FRIENDLY, WE CARE**

During the production process, St.James maintains a strong focus on environmental criteria and health guidelines:

- St.James is produced from 100% natural raw materials without any chemical additives;
- St.James' glaze is lead and cadmium free;
- St.James utilises natural gas in the course of the production;
- St.James' production processes are based on recycling management.

STRONG AND VERY LIGHT IN WEIGHT. THE FINESSE OF THIS LUXURIOUS DINNERWARE ENSURES A PREMIUM DINING EXPERIENCE.

# PERSONALIZE YOUR PORCELAIN, GLASSWARE OR GREASEPROOF PAPER

Are you interested in printing your own logo on glassware, plates or greaseproof paper? We can offer you an interesting, efficient and cost-effective way to personalise your items.

Personalized items provide an extra communication opportunity at the table and many visitors can appreciate these details. It makes your covered table even more unique.

We offer a number of interesting, efficient and cost-effective solutions to personalize your items. Do you have questions or are your wishes not described as an option below? Contact us and we will be happy to talk over the possibilities with you.

## PRICES

Due to the large amount and variety of needs and options within our range of products, we check each project individually. We would be happy to send you a price offer tailored to your specific wishes. Please contact us and be amazed by the convenience and pricing.

## MINIMUM ORDER

You can get a price offer for each quantity. We only require you that you order per box.

## ARTWORK

Please send us your digital logo/design in EPS format together with the desired colour in PMS for any desired logo colour.

## DELIVERY DEADLINE

After final confirmation from your side, the items will be sent to the printer. It typically takes up to three weeks for the items to be printed with your logo.

## DISHWASHER

Your logo is burnt into the porcelain and is safe for use in your dishwasher.

## SAMPLES

You will be charged in case you wish to receive samples. When placing an order, these costs are usually deducted.

\* Notice: If you put a logo on glassware or porcelain this can be detrimental to the strength of the product.

\*\* Chip Warranty on items will expire after logo printing.

# MAINTENANCE

Guidelines for the product care of 18/10 cutlery:

Occasionally it occurs that new cutlery, after the first use, gets stained and/or leaves metalmarking on tableware. These symptoms are usually caused by the handling of the cutlery. All 18/10 cutlery, whatever brand or price, is made of the same type of steel. On old, scratched and tarnished cutlery, these phenomena are less visible, but with new cutlery they are even more visible. Below we will give some tips on the product care of your cutlery, for the prevention of stains on the cutlery and the prevention of metalmarking on tableware.

Before first using cutlery:

Wash the cutlery by hand before first use. During the final processes, the cutlery is polished in the factory. This gets done with gloss polish. Most of the polish disappears during polishing, however, it may occur that some of the polish remains behind on the inside of the point of the forks and/or cutting surfaces of the knives. It is important to wash it off before it comes in contact with aluminum, stainless steel or certain substances in dishwashing detergents. When it comes in contact with these materials it can cause a chemical reaction that will leave rust / blue tarnish on the steel. When the cutlery is immediately put into use (without first having washed been by hand), metalmarking may occur on other items.

General tips:

- Remove food residues, especially at the beginning, from the cutlery as soon as possible.
- It is preferred not to put cutlery in the dishwasher simultaneously with stainless steel or aluminum pans and such or stainless steel cutlery. By electrolysis \* stains / dots can occur on the cutlery).
- Do not soak cutlery.
- Keep the knives separate of other cutlery in the dishwasher.
- Place the knives upright in the basket of the dishwasher. Do not wash cutlery with chlorine or other aggressive solution in case of extreme soiling.
- Dry and polish the cutlery immediately after dishwashing.

\* Electrolysis: 'poor' metallic succumb to noble metal.

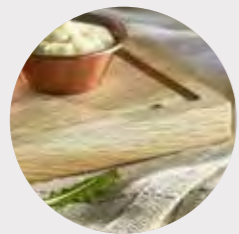

# CARE FOR PRODUCTS

## PORCELAIN

All of our porcelain is safe to be used in commercial dishwashers, microwave ovens and furnaces. It is important to follow the guidelines of the dishwasher manufacturer. Excessive coil temperatures or use of detergent may cause damage to the glaze. Most damages occur when placing dishes in, or removing them from the dishwasher. It is recommended to use a dishwasher basket to prevent contact with other items. When removing excess food residue a plastic scraper should be used to prevent the glaze from being damaged. Never use metal objects or cutlery.

Cutlery and other metal objects, for example pans, should never be washed simultaneously as this may cause metal marking. Remove metal markings with a soft abrasive or cleaner for ceramic cookers.

## WOOD

All types of wood are not suitable for dishwashing and should be washed in warm soapy water only. Wood can dry out with use, so occasional application of vegetable oil or food safe wood treatment oil will help to keep the original natural appearance and prolong the life of the product.

It should not be left to soak in water, as this will cause damage to the product and should be dried immediately after washing.

- Wood is a natural material and will show signs of use after a period of time.
- Starting at 500 pieces, wood can be custom made.

## GLASS

Our range of glassware is designed to be washed in commercial dishwashers. To ensure the ongoing quality of the product we recommend the following:

- All new glasses should be washed before first use. We recommend the use of dishwasher baskets to minimize the risk of cracks. Glassware should not be washed at temperatures above 60°C as this can cause debris to be baked onto the glasses during the washing process. Glasses that are found to have been cracked or chipped in use should be disposed of and not placed into the dishwasher. Non-caustic detergents should be used as caustic detergents can damage and dull the surface of the glass.
- To prolong the life of hot drinks glasses we recommend pre-heating the glasses by running them under a hot tap.

Do not put cold liquids straight into glassware that may be hot or warm as this can cause cracks.

## MELAMINE

Melamine is a robust, highly scratch, chip and break resistant plastic that if cared for correctly can provide a great value alternative to ceramics. Use plastic or rubber scrapers to remove excess food residue before washing, as metal utensils or abrasives may damage or scratch the products surface. Do not use abrasive detergents or bleaches when washing, as this may stain or damage the products surface.

Melamine products are dishwasher safe but are not suitable for use in furnaces or microwave ovens and are designed to be used in temperatures from -20 to +70°C. Melamine is suitable for use in chafing dishes and bain maries within the above temperature guidelines. When using melamine in combination with chafing dishes it is important to use a sufficient amount of water.

## CUTLERY

Occasionally it occurs that new cutlery, after the first use, gets stained and/or leaves metalmarking on tableware. These symptoms are usually caused by the handling of the cutlery. All 18/10 cutlery, whatever brand or price, is made of the same type of steel. On old, scratched and tarnished cutlery, these phenomena are less visible, but with new cutlery they are even more visible. Below we will give some tips on the product care of your cutlery, for the prevention of stains on the cutlery and the prevention of metalmarking on tableware.

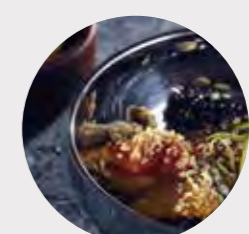

Before first using cutlery:

Wash the cutlery by hand before first use. During the final processes, the cutlery gets polished in the factory. This gets done with gloss polish. Many of the polish disappears during polishing, however, it may occur that some of the polish remains behind on the inside of the point of the forks and/or cutting surfaces of the knives. It is important to wash it off before it comes in contact with aluminum, stainless steel or certain substances in dishwashing detergents. When it gets in contact with these materials it can cause a chemical reaction that will leave rust / blue tarnish on the steel. When the cutlery are immediately put into use (without first having washed by hand) metalmarking may occur on the dishes.

General tips:

- Remove food residues, especially at the beginning, from the cutlery as soon as possible
- It is preferred not to put cutlery in the dishwasher simultaneously with stainless steel or aluminum pans and such or stainless steel cutlery. (By electrolysis \* stains / dots can occur on the cutlery)
- Do not soak cutlery
- Keep the knives separate of the other cutlery in the dishwasher.
- Place the knives upright in the basket of the dishwasher. Do not wash cutlery with chlorine or other aggressive solution in case of extreme soiling.
- Dry and polish the cutlery immediately after dishwashing.

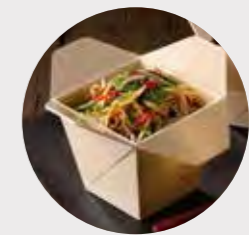

\* Electrolysis: 'poor' metallic succumb to noble metal

## STAINLESS STEEL

All of our stainless steel products are (commercial) dishwasher safe. To ensure ongoing quality and to prevent stains we recommend the following:

- Be careful with salty and sour products. Vinegar or lemon juice for example may affect the surface. Polish stainless steel immediately when it comes into contact with such products. Otherwise white spots and dents may appear.
- Do not let stainless steel become too hot. Blue/brown stripes may appear which can only be removed with professional stainless steel maintenance products.
- Do not use steel wool or abrasives, this may scratch the surface.
- Stains on products can easily be removed with a cotton cloth and several drops of salad or olive oil. If necessary, polish the product with a dry cloth.
- Every now and then you can add a little amount of ammonia to the water and clean the stainless steel with it. Make sure to use a soft cloth or brush to prevent the surface from scratching.

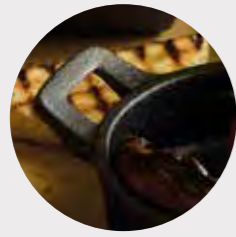

## BAMBOO FIBRE

Bamboo fibre is a very robust and natural material. It can withstand the cold from the refrigerator and even the freezer and can indirectly\* be heated to 140°C. Besides that, all bamboo fibre products are (commercial) dishwasher safe.

Bamboo fibre products are not suitable for use in microwave ovens. We do not recommend cleaning the product with a scouring sponge or stainless steel objects to prevent scratches. We also advise not to use a detergent or bleach when cleaning the product.

\* Do not place directly on the source of heat.

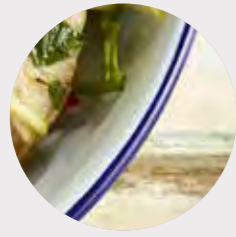

## PRODUCT CARE

### CAST IRON

Cast iron is ideal for serving dishes directly from the oven, since it can withstand high temperatures. Cast iron is not suitable for use in the dishwasher or microwave ovens.

Cast iron will rust if it isn't dried immediately after washing. After drying, lightly coat the inside of the pan/product surface with oil. This will help to restore any seasoning that may have been lost during washing.

### ENAMEL

Although enamel forms a very hard cooking surface, it can chip when used intensively or when it becomes old. To prolong the life of enamelware we recommend the following:

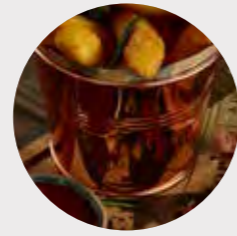

- Wash before first use
- Before use, use a light coating of cooking oil to protect the enamelware from staining and makes the washing easier
- After use, soaking the product in warm or hot water and gently wash with a liquid detergent
- Do not use abrasive cleaning pads or gritty soap powders, as they may lead to chips
- Do not place empty enamelware or allow to boil dry on a hotplate or gas hob.

\* Please note that Chipped enamel cookware poses a health risk because enamel chips can end up in food. We recommend that all chipped enamel be disposed of immediately.

### GALVANISED STEEL

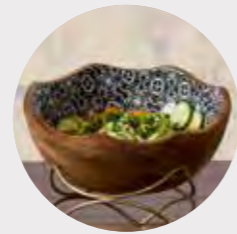

Galvanised steel is not suitable for dishwashing or microwave ovens. Galvanised steel should not come into contact with foodstuffs and should always be protected with one of our greaseproof paper liners.

### COPPER PLATED

Copper is not suitable for dishwashing and should be hand washed. Clean with a soft sponge, brush or cloth so the surface does not scratch. Do not use abrasive cleaning products and ensure to completely dry the product with a soft cloth after each wash. When the product is displaying signs of tarnish, rub with a soft cloth.

Make sure the copper does not come in direct contact with sour products like vinegar or lemon juice, as this may affect the surface.

### WOODEN BUFFET BOWLS

Wooden buffet bowls are not dishwasher proof. Do not soak the bowls. Clean with a wet cloth and dry immediately after use.
